

The Tactical

Having been fielded for 40 plus years the AR family of rifles and carbines has become the United States most familiar and loved semi-automatic rifle. Suitable for civilian, law enforcement, and military use, the design is intuitive to operate, easy to maintain and there are plenty of options for personal customization. It is for this reason that SWORD International introduces the Mk-15 Mod1 series of direct impingement rifles and carbines.

Tac-Carbine

The Tac-Carbine was designed to be a lightweight blend between tactical modularity and competition performance. The direct impingement operating system is smooth, with low recoil. It has an extremely accurate barrel and features a modular slim rail design to allow the end-user to equip the rifle in any configuration that suits their mission set. Capable of performing in many situations, from hunting, home defense, to 3-gun competition, the Tac-Carbine is a great choice for anyone looking for a more advanced and versatile carbine.

Patrolman

Patrolman

The Patrolman carbine is a reliable, durable, and economical addition to any law enforcement agency, military unit, or civilian's collection. The Patrolman allows the end user a base platform that conforms to a standard "mil-spec" configuration, which is required by some law enforcement and military units. The patrolman features a rugged battle proven set up and design, easily configurable to meet the end users needs.

- 1 Upper Receiver**
Forged 7075T6 aluminum
Type III hard coat anodized
Flat-top receiver, M-1913 MIL-STD
at the 12 O'clock position
Optic ready

- 2 15" Handguard w/ M-LOK™**
Midwest Industries handguard
M-LOK™ and OD mounting positions

- 3 16" Match-Grade Button Rifled**
Black nitride coating
1:8" Twist
