

Mk-17 Mod 0 Tyrant 22 Battle Carbine

7.62 x 51mm NATO/6.5 Creedmoor
Self-Regulating Gas Piston Platform

Named after Sgt. 1st Class Kristoffer B. Domeij, 29

Who was killed on his 14th deployment in Afghanistan on October 22, 2011. He was the Army's first qualified Joint Terminal Attack Controller (JTAC) evaluator and his call sign was Tyrant 22. Kristoffer holds the 'distinction' of being the most deployed soldier in American history to be killed in action. Fearless in life and in combat, Domeij is remembered by friends and comrades as a consummate warrior and true professional. Col. Mark W. Odom, commander of the 75th Ranger Regiment, said Domeij was a veteran of hundreds of combat missions "whose ability to employ fire support platforms made him a game changer on the battlefield an operator who in real terms had the value of an entire strike force on the battlefield." Lt. Col. David Hodne, his battalion commander, said "this was a Ranger you wanted at your side when the chips were down."

Mission:

The Mk-17 Mod 0 Battle Carbine has been purpose built to give designated marksman a lightweight compact platform with long range precision capabilities. At 9 pounds and with a 16" barrel this rifles has the feel of a carbine but is gifted with the ballistic capability of the 7.62x51 cartridge. This platform has been accuracy tested to 1/4 MOA. The rifles ergonomics make weapon manipulation easy, due to its intuitive design. With lighter weight, better accuracy, ergonomics, and reliability, the Mk-17 Battle Carbine sets a new standard for .308 performance.

INTERNATIONAL

1 Magpull ACS-L Stock

2 Proprietary Heavy Buffer

Tungsten filled with recoil reducing Urethane bumper

3 Over-Molded Rubber Grip

Custom Logo rubber over-molded grip

4 Safety

Ambidextrous safety selector

5 Magazine Release

Purpose built Ambidextrous

6 ALG Advanced Combat Trigger

7 Bolt Catch/Release

Built-in ambidextrous bolt catch/release assembly

8 Flared Magazine Well

9 15" Free Float Rail

With M-LOK mounting solution

10 Short-Stroke Piston System

Reduces heat & eliminates carbon fouling in the upper receiver

11 Lightweight Gas Block

12 Premium Button Rifled Barrel

Black nitrite coated Accurate and durable

13 Tuned Compensator

Reduces recoil and Eliminates muzzle rise

Tech Specs:

Operating System: Short Stroke Gas Piston
Caliber: 7.62 x 51 NATO/6.5 Creedmoor
Weight: 9.34lbs W/O Magazine, 9.78lbs W/ Empty magazine
Length: 35.6" W/ Stock collapsed, 39" W/ Stock fully extended
Height: 8" Rear sight to bottom of pistol grip
Coatings:
Milspec Type 3 Hardcoat Anodize - Black
SWORD Custom Cerakote - Assaulter Grey, Regnar Green, Battle Brown
